

## School Improvement Plan for Student Achievement and Wellness

### Literacy and Numeracy

#### Goal:

In an effort to increase student success and engagement, staff will:

- Provide students with an increased number of “real world” learning experiences as well as to present their learning to the school and the community of North Glengarry.
- Expose student learning through methods other than traditional testing. For example, projects, conferences, conversations, and other finished products.

#### Plan:

- Staff will identify opportunities for students to “publish” their learning (ex. Open House, St. Andrew’s Day, newsletters, community publications, Web publishing, Science Fairs, working with community groups and businesses, etc.).
- Staff will collaborate to provide cross-curricular opportunities to publish work.
- Students will have increased opportunities to demonstrate their learning through hands-on/experiential learning, conversations, and other interactions with peers, staff, and community members.

**Reflection: (to be posted in February and in June)**
